

Summer 2013

Saturday Mornings
9:30 am – 11:00 am

10 weeks

May 4 – July 13
(no class May 25th)

Grade School Age Children
(Exiting grades K – 5)

\$15/week or
\$135/entire session

This program is designed to be an interactive program for children and their parents or caregivers.

Children should attend with a family member to work together on developing gardening and social skills through a fun, interactive program.

Don't let finances prevent you from attending. Contact us today for a scholarship application!

GROW

A Summer Gardening Program

Skills to Succeed – Grow Program

Grow is a gardening social skills program for grade school age children with Autism Spectrum Disorders or related needs. Join us in learning to grow plants, flowers and vegetables while making friends and interacting with others.

Cultivating more than plants...

Join your child in this interactive group to learn more about gardening through a variety of activities. Each week includes:

- ★ Learning about gardening
- ★ Completing a gardening activity
- ★ Recreational and/or art activity
- ★ Healthy snack
- ★ Creating a photo journal

Children will improve skills by working in groups and teams toward a common goal, eating new foods, learning where food comes from, completing tasks, and developing tactile skills.

Studies have shown that gardening can dramatically improve the communication and social skills of children with developmental needs. In addition to learning about gardening, your child can develop social skills that are often difficult to cultivate, including acclimation to dirt and chaos, task completion, social interactions to complete a common goal, and tactile manipulation of objects.

We have a limited number of spaces, so please sign up early. Scholarship applications are available upon request and are assigned based on need and availability.
